

RoundsMD For Long-Term Care Facilities

roundsmd.ca
admin@roundsmd.ca
Facility overview · Aug 2026

A physician–facility workflow layer on PointClickCare — staff assign tasks and message securely; physicians round with fewer gaps. Hosted in Canada.

Easy staff access: Staff sign in with PointClickCare — if they have PointClickCare access at your home, they have RoundsMD. No separate password to manage.

THE GAP

- PointClickCare is the chart — not a tool for reaching the right physician quickly
- Nursing uses calls, texts, fax, or chart notes and hopes someone responds
- On-call physicians document in PointClickCare; the attending MRP may not know until the next round
- New most-responsible-physician (MRP) assignments don't always trigger a physician visit

RoundsMD does not replace PointClickCare. It adds tasks, secure messaging, and notifications between your team and attending physicians.

HOW IT WORKS

Staff → assign task / message → **Physician Today** → round & complete | **PointClickCare** ↔ chart · progress notes · MRP

LIVE TODAY (FACILITY-FACING)

- **LIVE** Staff portal: residents by unit, chart view, PointClickCare progress notes
- **LIVE** Assign tasks to a physician — optional priority flag
- **LIVE** **Secure messaging** — nursing ↔ physician (patient-context)
- **LIVE** Tasks appear on the physician **Today** page during rounds
- **LIVE** Manager portal: PointClickCare link, staff invites, facility profile
- **LIVE** Priority nursing task → physician notified (app + email)
- **LIVE** New MRP / admission → physician notified
- **LIVE** On-call physician writes a PointClickCare note → MRP notified

BC privacy: Privacy evidence package available for joint review (privacy narrative, privacy policy, breach & retention). Contact admin@roundsmd.ca.

SECURITY & PRIVACY

- Application data hosted in Canada
- PointClickCare sign-in confirms staff belong to your facility
- Staff see care-coordination tools only — not physician billing
- Facility task history retained for accountability

WHAT'S AHEAD

- **PLANNED** **Vitals entry** from RoundsMD into PointClickCare
- **PLANNED** **Document upload** to the PointClickCare chart
- **PLANNED** **Pharmacy pathway** — send prescriptions from RoundsMD (under evaluation)
- **FUTURE** Deeper pharmacy electronic prescribing

Ready to go live: connect PointClickCare · invite staff · confirm attending physicians — operate from day one. Success = real task and messaging use, priority response within 24 hours, physicians aware of admissions and coverage visits sooner. Requires a **one-time PointClickCare app approval** — we work with your IT on setup. **Contact:** admin@roundsmd.ca · roundsmd.ca
