

Your panel, a Today list for rounds, nursing follow-ups, and MSP claims — in one Canada-hosted workspace. Built by a practising BC long-term care physician.

PointClickCare is not required. Add patients yourself and round from Today. When a home connects, you also get the panel, chart details, and alerts for that site. PointClickCare stays the chart; RoundsMD is the rounding, messaging, and billing layer.

What Monday looks like

Flag a follow-up → Today list → you round → Done + Claim

THE GAP IT FILLS

- Your panel is split across homes, paper lists, and texts from nursing
- Follow-ups live in a chart note and hope the right physician sees them
- MSP billing is a second job after you leave the building

WHAT YOU GET

- Today — visits due and nursing tasks, filterable by home
- Secure messages with nursing, tied to the patient
- MSP claims from the same screen when you're billing that encounter
- Works in the browser; Android app available

TRY IT (~15 MIN)

1. Create an account at **roundsmd.ca**
2. Add a few patients — or email your list and we'll import it
3. Open **Today** before your next round

Step-by-step (account, patients, claims): roundsmd.ca/handouts/physician-getting-started.pdf

Try it: roundsmd.ca — CPSBC verification, then a confirmation email. **Import or a 10-minute walkthrough?** admin@roundsmd.ca
